The Honorable William K. Reilly
Administrator
Environmental Protection Agency
401 M Street SW.
Washington, D.C. 20460

Dear Administrator Reilly:

I am the Chairman of the Coal and Oil Resources Committee of the Illinois House of Representatives. I am deeply concerned about air quality in Illinois and aware of the need to reduce air pollution in our area and throughout the United States.

I am informed that the Environmental Protection Agency is presently considering a performance additive known as HiTEC@3000. It is my understanding that tests have shown that this additive may significantly reduce air pollution related to automobile emissions. This being the case, I am sure that you will agree that this additive warrants full review.

We need to consider all means to improve air quality on both the state and federal levels. For this reason, I urge you to afford this performance additive every possible consideration.

Thank you for your consideration.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Larry W. Hicks'.
